Vocabulary Self-Awareness Chart

Word	+	٧	-	Example	Defination

Procedure:

1. Examine the list of words you have written in the first column.

Put a mark in the + column for each word you know well enough that you can write an accurate example AND definition. Your definition and example must relate to the unit of study.

3. Put a mark in the **v** column for each word you know for which you can write either a definition OR an example, but not both.

4. Put a mark in the -- column for each word that is new to you.

This chart will be used throughout the unit. By the end of the unit you should have the entire chart completed.
